

Statement

To whom it may concern,

As the new variant Omicron emerges, it concerns the world that the new variant has a large number of mutations, and its transmissibility is still unknown.

We, Vitrosens Biyoteknoloji Ltd. Şti., located at Şerifali Mah. Şehit Sk. No:17, 34775, Ümraniye, İstanbul, would like to declare that the following listed variants can be detected effectively by Vitrosens Biyoteknoloji Ltd. Şti.'s RapidFor™ SARS-CoV-2 Antigen Test Kit.

The identified SARS-CoV-2 variants include:

WHO Label	Pango Lineage
Omicron	B.1.1.529
Alpha	B.1.1.7
Beta	B.1.351
Gamma	P.1
Delta	B.1.617.2
Lambda	C.37
Mu	B.1.621

As usual, we will be bringing you more as the variants develop and we will keep our database updated and focus on evaluating the detection ability of our kit against SARS-CoV-2 variants, maintain its sensitivity and specificity.

Bifour Biotech Inc., as one of the leading Chinese IVD enterprises, has witnessed and experienced great progress in both product development and market presence. We've been committed to providing professional, yet reliable SARS-CoV-2 test reagents and corresponding solutions to fight the pandemic together!
